John is a certified Safety Professional with over 35 years of experience in the safety field. He is a leader who exudes energy and professionalism and prides himself on effective communication and team building. He brings his tireless work ethic and occupational health and safety expertise to each UASC client he works with.

John is a performance-driven Environmental, Health and Safety professional with experience as a strategic member of corporate leadership teams. He has extensive experience in establishing rapport and credibility with diverse groups ranging from manufacturing employees to executive team for Environmental, Health and Safety Compliance. John is solution-oriented with an eye toward bottom line results.

No stranger to large operations, John has been responsible for safety programming and auditing for companies with up to 4,000 employees and up to 6 facilities throughout the US and Canada. In these roles, he acted as the site authority in all areas of safety, industrial hygiene and environmental requirements. John employs his excellent organizational and communication skills to manage the safety of such large sites. He is able to handle high-stress and dynamic situations like the seasoned professional he is.

John assists our clients with site-specific health and safety program development, safety and health inspections, and conducting site safety auditing and safety management services for large commercial projects.

John is certified to teach a number of other occupational health and safety courses including NFPA Electrical Safety, PIV and Ergonomics.
