Michael is a conscientious and reliable safety professional who brings over eighteen years of experience in Construction Safety in a variety of projects and work sites. He is a proven safety manager focused in facilitating continual improvement in knowledge, practice and exposure reduction while regulating construction compliance programs under OSHA Standards.

Michael gained highly valuable knowledge through his OSHA training and certifications, and while on the job performing preconstruction planning, subcontractor management, job hazard analyses, site logistics and working directly with trade employees. He is a resource and guide to OSHA compliance and a team builder in the development of an educated safety culture.

His safety management experience includes working with large worker populations, diverse and numerable trades and large private and public sector construction projects. Michael has a successful history of lowering the rate of injuries and EMR through his safety management efforts.

He has provided safety management for commercial building construction, major infrastructure project and structural steel construction projects.

Michael provides site safety auditing and safety management services for our clients as well as health and safety plan development and safety and compliance training. His ability to lead and foster an appreciation for safety in teams has improved safety for our clients and lowered their insurance costs and reduced injuries and time away from work.

His tireless work ethic and professional, easy-going demeanor are an asset to our safety consulting team.
